GLIMPSE OF THE CLASSROOM

Glimpse of the classroom

Topic: Shadow

Activity for grades 2 students.

Shadows are formed when an opaque object or material is placed in the path of rays of light. The opaque material does not let the light pass through it. The light rays that go past the edges of the material make an outline for the shadow.

Act Of Kindness

Kindness is an attribute that is essential in every individual. In our everyday life, we come across many strangers, but if we show them kindness and respect, we stay in their hearts forever. If you are kind, your attitude and behaviour proves you different from the crowd. Your kind attitude can give you internal satisfaction and bring a bright smile to your face. Every individual should try to reflect the quality of kindness to the people around them. Every time you are kind to others, you become a better person. Your kindness will assist you when you are alone or depressed, or in need during your hard times. People will always be willing to help you and stand by you whenever needed. It might be a happy moment for you if you hurt others, but that does not last long; but for others, it can be the most painful moment forever. Kindness has no specific definition. It is an act of showing love, care, affection, and empathy, without any reason.
