## OVERVIEW OF LIS

Laxmi international school has a well-designed beautifully landscaped student friendly campus spread over an area of 120 acres of land. LIS is divided into three sections for convenience and effectiveness.

Pre Primary School (Nursery to senior Kindergarten) Junior School (classes I – VIII)

Senior School (Classes IX to XII)

Laxmi International School offer a wide curriculum in the main learning areas- BASED ON THE CBSE CURRICULUM as per NEP 2020. Students are prepared for other education like- Teamwork, self-expression and personal development that happen outside the classroom. Laxmi International School is CBSE affiliated school & do more than just educating students. Laxmi International School prepare students for life. They develop communication skills, respect for themselves & self-discipline.

Building a sustainable society of curious and creative young innovators, who succeed through personal initiative and sustained efforts empowered with equal opportunities to thrive and flourish, enhancing each life by spreading "One Happiness! ".

## TRUSTEE'S MESSAGE

Today life is on the fast track with gigantic changes in the fields of science, technology, management, information, and communication. We see around us an array of global changes that were unheard of before. This situation demands an education system that will help the pupil face the changes. Thus, education for us means equipping the pupil with the means to find the answers for himself and within himself so that he emerges a multi-faceted persona. The school seeks to ensure that the children can develop

their fullest potential according to their unique natural abilities.

We, at Gajera Group of Schools want our pupils to have a vibrant dynamism, an unparalleled knowledge base, an acute consciousness about the world, a focused ambition, and a sustained commitment. We strive to give an exposure to the hard realities of today's world thus making them more mature and mentally agile. We are committed to challenging and guiding young minds.

Education is a platform to shine and polish the student's qualities to make them lifelong learners, critical thinkers, and productive members of an ever-changing global society. We make sure that our students enhance in moral values of Indian culture, to be good human beings. Our Schools have with fantastic ambience with the latest digital technology, the best teaching staff, and administration. In short, to bring out the best in learners and educate the future generation of the country.

*Finally, I would like to conclude with a quote from - **Rabindranath Tagore's saying-***

***“The highest education is that which does not merely give us information but makes our life in harmony with all existence.”***

**Wishing you the best academic year ahead.**

## TEACHER'S VIEW

*Anupama Gour*

M.A Counselling and B. ED Special Education in Learning Disability “If they can’t learn the way we teach. We teach the way they learn.”

I believe that creating inclusive learning environment is essential for the success of all students, but especially those with special needs. I strive to create a positive and supportive classroom atmosphere where students with special needs feel confident and respected. To do this, I interact with class teachers and subject teachers and we together make sure that these special students do not feel alienated. When assessing a student’s individual needs, I always begin by gathering as information as possible. This includes conducting interviews with parents, teachers and other professionals, observing the student in their environment, using assessments. Once I have this information, I use it to develop an IEP that meets the student’s individual needs. I ensure the plan is tailored to the student and regularly measure progress against the goals outlined in the IEP.

## **ADDITIONAL LEARNING OPPORTUNITY**

### ***Home work and assignments:***

Homework allows students to practice and reinforce the concepts they learned in class, helping them retain the information. Research assignments encourage students to explore new topics and improve their research skills. Students can develop self-discipline and time management skills by completing assignments on their own.

Assignments often require students to think critically and solve problems, promoting higher-order thinking skills. Writing assignments help students improve their written communication skills. Group assignments teach collaboration and teamwork, which are valuable skills in many aspects of life. Homework teaches students to manage their time effectively and meet deadlines.

Students can apply what they've learned in real-world situations through assignments.

Overall, homework and assignments serve as a bridge between classroom learning and practical application, helping students develop a range of skills and knowledge.

# GLIMPSE OF CLASSROOM

## Topic : Shape Element

It encourage the students to make the colourful background with poster colours and show their creativity.

They do this activity by enjoying and taking interest.

Objective of this activity is to develop their creativity, concentration, patienceand also cutting pasting.

Students need to draw a face of Zebra with white paper, strips of black paper and grass of green colour paper. After cutting they will arrange all the paper in a proper composition.

## SHARE A GOOD NEWS STORY

Our school hosted the CBSE Cluster XIII Athletics Event from October 18, 2023, to October 21, 2023. This event was a source of pride for us as we have represented our school at the Cluster Level.

The school's enthusiastic principal, Mr. Pravin Pawar believed that such an event would not only promote physical fitness but also bring the community together.

The excitement in the school was palpable. Students practiced tirelessly in their respective sports, cheered on by the supportive teachers and parents. The school's sports facilities were spruced up, and volunteers from the community offered to help with logistics and concessions.

On the day of the event, the school's field was transformed into a hub of activity. Teams from neighboring towns and cities arrived, filling the air with an atmosphere of healthy competition. The opening ceremony was a grand affair, mesmerizing prayer, classical dance and inspiring speech by DYSP Shri Kuldip sir and Shri Ramanbhai Patkar.

Over the next few days, the athletes gave their all, displaying great sportsmanship and determination. It wasn't just about winning; it was about bringing out the best in each participant. The cheers of the spectators resonated through the air, and the community came together to support their young athletes.

As the event neared its conclusion, the closing ceremony celebrated the achievements and camaraderie that had developed over the course of the tournament. Trophies and medals were awarded, but the true victory was the sense of unity and pride that engulfed the school and the town.

The Cluster State level sports event became an annual tradition, growing in popularity year by year. It not only fostered a spirit of sportsmanship but also strengthened the bonds within the school and the community, leaving an enduring legacy of shared achievements and shared dreams.

## RESOURCE CENTRE

Sports keep the body and mind active as children learn a lot through playing. They enjoy play more than anything, right from toddler age. Indoor games help children develop their fine motor skills to handle the coins, the board and gather their focus and catch their attention. Interaction with others teach them how to handle success and to be a team player.

Schools play a major role in introducing the games to the children as they spend a major time in school. Equal importance is given to Indoor games also. Students get to play Chess, Carrom, Table tennis, etc. in addition to exposure to outdoor games. Encouragement comes in form of tournaments that helps them to prepare with enthusiasm.

LIS believe, a child requires both indoor and outdoor games for holistic development. Basketball, Table tennis, Carrom and other board games improve the concentration and coordination among the students. Hand eye coordination improves, puzzles and board games improve their analytical ability.

While playing the indoor games, the probability of getting physically hurt is very less when compared to outdoor games like cricket, football, etc. Also, there is no dependency on climate outside, as Indoor games require less space and the temperature can be controlled.

## NEW HAPPENINGS

### CLUSTER EVENT (2023)

Cluster event was organized from 18/10/23 to 21/10/23 by C.B.S.E at Laxmi International school to select students at the National level. 124 schools from west zone CBSE schools under 14 ,under 17 under 19 participated in different events such as long jump, javelin throw, discus throw ,relay race 100mts,200mts and 400mts. These games comes under atheletics .The opening of the ceremony was on 18/10/23 Special dignitaries were invited .Students enthusiastically participated in all the events. All the participants were given certificates and winners ranking at first position was given gold medal ,second position was given silver ,third position was given bronze medal Students were motivated by their coaches and the LIS team. The team of LIS were assigned different duties and they worked with full dedication to make this event a grand success .

## CCA/CCE / CLUBS

The students' drawing creativity during the CCA period was truly remarkable. They demonstrated their artistic talents through a wide range of creative drawings, including school logos and logos like YouTube. This showcases their ability to think outside the box and express themselves through visual art.

Additionally, the activity allowed them to explore different design concepts, color combinations, and styles, further enhancing their artistic skills. It's wonderful to see how these co-curricular activities not only promote creativity but also encourage students to collaborate, share ideas, and develop their fine motor skills. Such experiences enrich their overall educational journey.

## ACT OF KINDNESS

Kindness is an abstract idea which helps the children to learn the vast meaning of a good quality. It can make a positive difference and hope in peoples' lives. Children realize the impact one person can make through a good act of kindness.

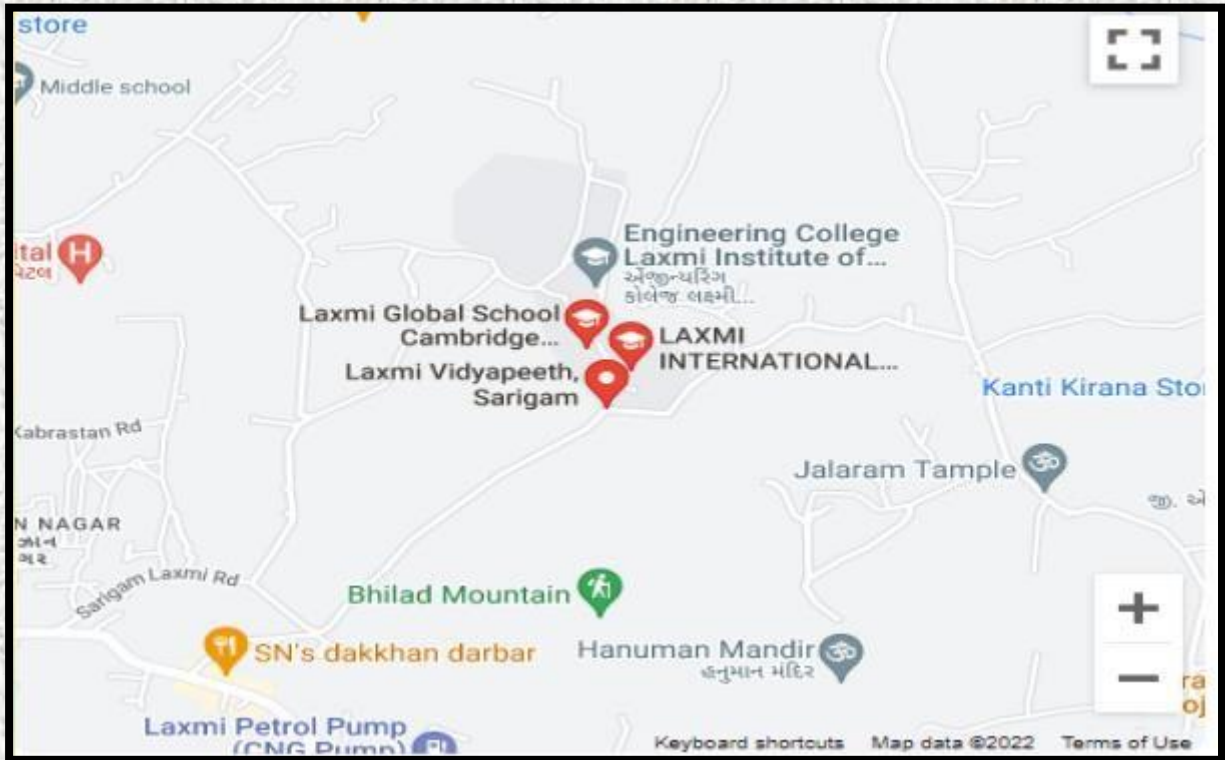

They get an opportunity to practice this valuable quality in real life situations.

It is certain that kindness is the most powerful weapon that exists in the world. It makes the people comfortable and pleasant. Let us have a few glimpses of this beautiful quality.
